

# New: The Passier Balance Snaffle Bridle – Pressure Relief, Flexibility and Stylish Design!

The new Balance Snaffle Bridle is especially horse-friendly and combines a number of convenient features!

**More pressure relief:** The soft, anatomically shaped head piece of the snaffle bridle has a recess on the cervical vertebra, which effectively relieves the top of the spine of the horse and ensures optimal distribution of pressure.

**More flexibility:** The narrow, anatomically formed and softly padded Flash Noseband with rings on the sides and double buckles on the chin offers exceptionally great flexibility and thus a very accurate fit. The flash strap loop can easily be removed in no time.

**More stylish design:** The waved browband is also softly padded and comes with small clinchers, matching the fittings in stainless steel and brass. This design completes the modern and sporty look of the snaffle bridle.

The new Balance Snaffle Bridle incl. reins with rings and double leather hand grips is available in Black with stainless steel fittings and in Havana with stainless steel and brass fittings in pony size, cob size and full size from selected Passier stockists.

13 additional exchangeable nosebands are available for the Balance Snaffle Bridle. For more information visit our website at [passier.com](http://passier.com) where you can also use the Store-Locator to find Passier dealerships in your area.
